Profile

Education

I am a third-year student at the Faculty of Computer Science and Engineering, at the Ss. Cyril and Methodius University in Skopje.

Skills and Experience

Throughout my studies, I have gained solid knowledge of various programming languages, technologies, and development environments.

I continuously work on improving these skills by developing practical experience through independent and group projects. As an individual, I excel in working independently, but I also thrive in team settings, where I take on the role of reliable team player and often a leader.

In group projects, I frequently take responsibility and actively contribute to task execution.

Dedication and Development

The hands-on experience gained through lab exercises at university, along with my daily efforts to learn new technologies and concepts, help me grow and tackle challenges more effectively.

My dedication and hard work are supported by continuous improvement and a strong desire to achieve high results.
